Testing and Quality Services

Practical services designed to help textile teams evaluate product performance, manage quality risk, and make informed sourcing and production decisions.

OUR SERVICES

01 — Softlines Testing

Fabric composition, tensile behaviour, seam strength, dimensional stability, and core performance validation.

02 — Chemical Safety

Support for restricted-substance screening, material-risk review, and chemical safety requirements.

03 — Colorfastness & Durability

Evaluation for laundering, rubbing, perspiration, crocking, wear, and everyday product performance.

04 — Flammability & Shrinkage

Safety and structural-integrity evaluation for textile categories where product performance is critical.

05 — Inspection & Auditing

Pre-production, inline, and pre-shipment inspections supporting product quality and shipment readiness.

06 — Expert Consultation

Method interpretation, corrective-action guidance, service selection, and testing-strategy support.

Specialty & Industrial

OUR PROCESS

- 01 Sample Intake**
Requirement review, scope definition, method selection, and timeline planning.
- 02 Method Execution**
Testing and inspection workflows aligned to the product and project requirements.
- 03 Reporting & Guidance**
Readable results, technical interpretation, and corrective guidance where required.

Why Work With SHINE?

Service-first support

Practical technical guidance

Quick and clear communication

Focused testing & inspection scope

From product development to shipment readiness, SHINE helps textile teams approach quality decisions with greater clarity and confidence.

Let's Discuss Your Testing and Inspection Requirements

Tell us about your product category, required services, sample quantity, quality concerns, and project timeline. Our team will help identify the appropriate scope and next steps.
